DETAILED ACTION

Election/Restrictions

1. Claims 16-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 11, 2007.
2. Applicant's election without traverse of the product claims 1-15 in the reply filed on July 11, 2007 is acknowledged. Please note, that claim 21 is drawn to the non-elected method.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 22-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 22-24 are considered vague and indefinite because of the limitation on lines 3-5 of the claim. The limitation that the thickness is thinner than required is indefinite because it is unclear what the "required" thickness is and how much is a significant increase in stability.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3781

6. Claims 1, 2, 4-9, 11-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seigel et al. (U.S. 6,698,336) in view of Beale et al. (U.S. 2003/0047838). Seigel et al. teach a receptacle for a food product having a body portion, shown in figure 1, a planar bottom portion 12 and annular sidewall 22. The sidewall is made of silicone, however, the base is made of ceramic material. Beale et al. teach that it is known to provide a baking container with a silicone base. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the baking container of Seigel et al. with the base being made of silicone, in order to reduce the weight of the overall container.

In addition, it would have been an obvious to reduce the overall size of the container, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Allowable Subject Matter

7. Claims 3, 10 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
